

WEEDER OPTIONS

Additional Tines

Keep your uptime going with additional tines. Univerco tines are built tough for weeding conditions.

Discs

10" discs are standard on the Eco Weeder, and 7" is also available. The 16" disc is for use with the in-between row unit for the 1 and 2 row weeder.

In Between Row Unit

Avail for 1 or 2 row weeder, and is pictured on 1 row.

Offset 3 Points

When two rows pass underneath the tractor you can off-center

Additional Belts

Stay running when it means the most, with additional belts.

Additional Wheels

Wheels for the 1 and 2 row weeder are available for purchase with your Eco Weeder.

Ridge Protector

Holds fruits and vegetables ridges in place while weeding

Straw Remover

To work faster on the mulch, the demulcher throws the straw between the rows.

Weed Your Crops With Ease WITH UNIVERCO ECO WEEDERS

ECO I - 1 ROW WEEDER

The Eco I weeder is ideal for small farms that have limited man power. Make your life easier with a Univerco Eco Weeder!

P.T.O – 540;
Tractor – 20 HP (min.)
Row width of 0.75 m (30") center to center (min.)
Wheel adjustment – 24" to 48" center to center
Category two – 3-point hitch
Eliminates the use of herbicides
No hydraulics needed
Works around and between the plants

ECO II - 2 ROW WEEDER

If there are two rows underneath your tractor, this machine will work on rows varying from 30" to 40" (center to center). Double your capacity from one to two rows and get your weeding done faster!

P.T.O – 540;
Tractor – 20 HP (min.);
Center to Center wheel width adjustment – 68" to 80"
Category two 3-point hitch;
Center to Center row width 30" to 44"
Works with two rows underneath the tractor
Eliminates the use of herbicides
Weeds between the mulch and plastic
No hydraulics needed
Works between and around the plants

ECO MULTI - 3 UP TO 8 ROWS MODELS

Save the most time in the field with a Univerco Multi Row Weeder!

From 3 to 8 rows configuration
Each unit adjusts independently from each other
Powered by the tractor's hydraulic system
Safety cut-off switch
Weed 25 acres and more a day
Will work in about every row crop
Unit adjusts to for your row spacing.
